Book Concept: 3.5 Book of Exalted Deeds

Concept: "3.5 Book of Exalted Deeds" explores the gray areas of morality and heroism. It's not a straightforward "good versus evil" narrative, but rather a nuanced examination of actions with unintended consequences, the compromises made in the pursuit of noble goals, and the complexities of defining "exalted" in a world where perspectives shift and ideals clash. The ".5" represents the fractional, uncertain nature of morality itself; the spaces between clear-cut decisions.

Storyline/Structure: The book will be structured around seven "deeds," each representing a different ethical dilemma faced by a diverse cast of characters. Each deed will unfold through multiple perspectives, showing the ripple effects of a single action across time and different people's lives. This avoids a simple "hero's journey" and instead explores the lasting impact of actions, both grand and seemingly insignificant. The narrative will weave together these seven distinct stories, revealing connections and hidden consequences as the book progresses. The final chapter will reflect on the overarching themes and leave the reader to ponder their own interpretations of what constitutes an "exalted deed."
