Introduction: Alexander II: A Ruler at a Crossroads

Alexander II ascended the throne in 1855, inheriting a Russia reeling from the Crimean War (1853-1856), a humiliating defeat that exposed the nation's deep-seated weaknesses. The Tsar faced immense pressure for reform; the

autocratic system was crumbling under the weight of social unrest, economic stagnation, and a crippling military inferiority. This was a Russia riddled with social stratification, with the vast majority of the population enslaved as serfs. This introductory chapter sets the scene, outlining the major challenges and opportunities Alexander II encountered at the beginning of his reign, highlighting the context that would shape his decisions.

The Crimean War's impact—exposing military shortcomings and highlighting the backwardness of the Russian economy—will be a focal point.
