Chapter 1: Equations and Inequalities - Unlocking the Power of Algebraic Manipulation

This chapter focuses on solving various types of equations and inequalities. We will explore:

Linear Equations: Solving equations involving one variable, using techniques like adding, subtracting, multiplying, and dividing both sides of the equation to isolate the variable. Examples include: $3x + 5 = 14$, $(x/2) - 7 = 3$.

Quadratic Equations: Solving equations of the form $ax^2 + bx + c = 0$, using methods such as factoring, the quadratic formula, and completing the square. We will also examine the discriminant and its role in determining the nature of the roots.

Absolute Value Equations and Inequalities: Solving equations and inequalities involving absolute values, understanding the concept of distance from zero and considering both positive and negative cases. Examples include: $|2x - 3| = 7$, $|x + 1| < 4$.

Chapter 2: Functions and Relations - Understanding the Building Blocks of Mathematics

This chapter introduces the fundamental concept of functions and relations. We'll cover:

Defining Functions: Understanding the relationship between input (domain) and output (range), and using the vertical line test to identify functions.

Function Notation: Utilizing function notation ($f(x)$) to represent functions and evaluating functions for given inputs.

Transformations of Functions: Exploring how functions can be transformed (shifted, stretched, reflected) using various algebraic operations.

Chapter 3: Systems of Equations and Inequalities - Solving Multiple Equations Simultaneously

This chapter delves into methods for solving systems of equations and inequalities:

Solving Systems of Linear Equations: Using methods like substitution, elimination, and graphing to find solutions to systems of two or more linear equations.

Solving Systems of Non-Linear Equations: Tackling systems involving quadratic, exponential, or other non-linear equations.

Graphing Systems of Inequalities: Shading regions to represent the solution set of a system of inequalities.
